The St Augustine’s School Development Plan (SDP) is a document that provides direction for all groups within the school. It guides present and future function of the school under four broad categories: Building Christian Community, Teaching and Learning, Occupational Health, Safety & Welfare (OHSW), Financial/Buildings and Grounds.

The SDP is formulated annually during Term 3 when the school staff and community undertake a thorough process of review. Each SDP is developed from the previous plan and addresses the next five years; the first year in detail and the following years more broadly.

Every 3 years a comprehensive School Review is completed that complements the SDP. The school review enables us to use the data collected from staff, students and parents as a platform for setting new goals and aspirations for our next three years (2013-2015). As in the case with any review and strategic planning process, it is imperative that all members of St Augustine’s Community have a chance to provide input. Parents, School Board members and students will be invited to contribute.

Following the return of responses, data will be collated and utilised to set out the SDP and annual goals.

We ask you to contribute towards this valuable process by completing the following questions below:

1. **Building Christian Community**
   St Augustine’s aspires to be a living experience of the Church’s mission. What do we need to do to improve the Building Christian Community or the Catholic Identity of the school?

2. **Teaching and Learning:**
   St Augustine’s is centred on learning, aspires to excellence where prior knowledge is recognised and celebrated, students are challenged to deep levels of thinking and needs, background and interests are reflected in the learning programs, and are committed to providing inclusive learning programs. What do we need to do to ensure that our teaching and learning provides an environment which engages students in authentic learning experiences necessary to become active citizens for this century and its society?
3. **Community**  
St Augustine’s is a place of welcome and connection. What do we need to do to create opportunities to welcome, affirm and support each other?

At St Augustine’s we are committed to develop sound ethical, pastoral, financial and management practices to ensure sustainability and safe facilities. What do we need to do to enhance these strategies into the future?
